EDUCATION

National Service for Industrial Training – SENAI

Technical Course in Information Technology

Jan. 2017 – Dec. 2018

Federal University of Alfenas – UNIFAL

Bachelor's Degree in Computer Science

Feb. 2020 – Aug. 2024

EXPERIÊNCIA

Unidesk solutions

Junior Software Developer

Mar. 2024 – Present

- *As a junior developer, I worked on creating and optimizing functionalities and interfaces, automating processes, and resolving bugs. I made adjustments to the front-end, implemented validations, optimized repository calls, and developed solutions to enhance usability and report generation.*

Unidesk solutions

Software Development Intern

Aug. 2023 – Mar. 2024

- *During my internship, using SQL, HTML, JavaScript, C#, and .NET, I created database tables, screens, buttons, and modals. I implemented validations, integrated with the back-end, and developed search functionalities. I also fixed bugs, improved usability, and refactored screens.*

PROJECTS

Adotar é legAU (React, Next.js, TailwindCSS): Developed a site to promote animal adoption, including an informational page, animal profiles with details and photos, and an admin login system for adding new animals.

Tales Ludos (Vue.js, P5.js): Expanded the Tales Ludos platform by introducing new challenge formats to enhance the learning experience.

Portfolio (React, Next.js, TailwindCSS): Created a personal portfolio showcasing my skills and previous projects. The portfolio features intuitive navigation, responsive design, and detailed sections to present my competencies and experiences clearly and professionally.

SKILLS

Programming Languages/Technologies: JavaScript, C#, .NET, React, Next.js, TailwindCSS, UI/UX, MySQL, Docker, TypeScript

Languages: English – B1 level
